OPERATIONS

Big Springs Gold Project, Nevada, USA

Operations at Big Springs continued to progress well through the Quarter. Plans for the initial first phase of mining operations are well advanced with details of the work undertaken during the quarter outlined below.

A drilling programme for the 601 pit area was completed in early December. Preliminary pump testing of selected drill holes was possible – however, more extensive testing will follow in Q2 2014 to provide the required additional hydrogeological data for mine planning and permitting purposes.

An exploration drilling Plan of Operations lodged with the lead regulator (US Forest Service) in the previous quarter is progressing through the approval process. This planned drilling is designed to target potential extensions of existing ore bodies at North and South Sammy and Beadle Creek. Drilling is expected to be undertaken in the June Quarter 2014.

A Plan of Operations for mining of the 601 pit is in final stages of preparation and will be lodged in the first week of February. This plan involves the open cut mining of the 601 pit (Figures 1 to 3) followed by underground mining of deeper sections of the 601 and 701 orebodies. Requisite baseline flora and fauna surveys have been completed and waste rock characterisation study work is underway. The approval for this Plan of Operations is expected this year (2014) with mine operations planned for late in the fourth quarter 2014.

In preparation for mining, a number of additional work programmes are progressing. A programme of collecting detailed bulk density data on historical and new (November 2013) drill core is near completion with data analysis to follow. An initial geotechnical assessment of the proposed 601 mining area has been completed and metallurgical studies on new drill core (also from the 601 area) has commenced. This work will continue into Q1, 2014.

Mining contractor rates for both the open cut and underground operations are being sourced from contractors with relevant experience operating in the Carlin region. The township of Elko 80 kms to the south is the regional mining services supply base for many of the mines located in the Carlin district.

Negotiations with parties to toll treat the ore have progressed well with the aim to have an agreement finalised in the first quarter 2014.

CORPORATE

The Company held its Annual General Meeting on 29 November. All resolutions put to shareholders were carried unanimously on a show of hands. Anova Chairman, Mr Jon Parker, resigned at the conclusion of the meeting, the final step in the corporate restructure that the company initiated in the prior quarter. Mr Mal James has taken over the role of Non-Executive Chairman.

As at 31 December, the Company's cash balance was \$1.34 million.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
