EXPLORATION PLAN OF OPERATIONS FOR BIG SPRINGS PROJECT APPROVED

Anova Metals Limited (“AWV” or “the Company”) is pleased to announce that the Company has received approval from the United States Forestry Service for its Exploration Plan of Operations (“PoO”) for drilling at the Company’s Big Springs Project, located in Nevada, USA (Figure 1).

The planned drilling in the approved PoO involves infill RC drilling of the proposed 601 open pit and underground zones (Figure 2) plus minor diamond core drilling for geotechnical and metallurgical sampling purposes. In addition, further geotechnical diamond core drilling is planned for the potential 701 underground zone plus hydrogeology drilling and pump testing of the proposed North Sammy underground zones.

The program also includes exploration drilling into resource extension targets for the 601 underground zone and Beadles Creek.

Clearing of drilling pads has commenced and the program is planned to start in October.

For any further information, please refer to the Company’s website (www.anovametals.com.au) or contact the Company directly on +61 8 6465 5500.
