2. PURPOSE AND EFFECT OF THE OFFER

2.1 Purpose of Offer

As announced on 21 October 2014, the Company is undertaking a placement in 2 tranches. The first tranche will be a placement of Shares to unrelated party investors utilising the Company's current 15% placement capacity. The first tranche Shares will be issued during the period in which the Offer is open. The first tranche Shares constitute approximately 32,802,640 Shares to be issued at 4 cents per Share to raise a gross sum of \$1,312,106 (New Shares).

The New Shares will be without a prospectus to institutional, sophisticated and professional style investors under section 708 of the Corporations Act and who are not related parties of the Company.

The Corporations Act restricts the trading of securities that are issued without a prospectus. The purpose of the Offer is to allow Shareholders holding the New Shares to be able to sell them without trading restrictions. This Prospectus has been prepared for the purpose of section 708A(11)(b)(ii) of the Corporations Act to remove any secondary sales restrictions on the sale of the New Shares. Section 708A(11)(b)(ii) of the Corporations Act removes secondary sale restrictions where relevant securities are issued while an offer of the same class of quoted securities is open under a prospectus.

Under the Offer, the Company will invite an investor to subscribe for 1 Share for 4 cents. The Company will only receive a nominal amount of 4 cents under this Prospectus and therefore raising funds is not a purpose of the Offer.

The second tranche of the placement is intended to constitute 9,447,360 Shares and 21,125,000 Options. The issue of these second tranche securities are subject to Shareholder approval to be sought on 28 November 2014.

2.2 Effect of the Offer

The effect of the Offer will be to remove the secondary trading sale restrictions on the New Shares issued.

The Offer will further:

- (a) increase the number of Shares on issue by 1 Share; and
- (b) decrease the cash reserves of the Company by approximately \$6,500, being the estimated costs of the Offer.

2.3 Capital Structure

The capital structure of the Company after the issue of 1 Share under this Prospectus and the issue of the New Shares is set out below.

2.4 **Effect on Financial Position**

The issue of 1 Share under this Prospectus will not have a material impact on the Company's financial position. For this reason a pro-forma statement of financial position of the Company showing the financial effect of the Offer has not been included in this Prospectus.

2.5 **No Effect on Control**

The issue of 1 Share will have no effect on control of the Company.

3. RISK FACTORS

3.1 Introduction

The Applicant for the Share should be aware that an investment in the Company is highly speculative. The Company is a mineral exploration company focused on developing the Big Springs Project in Nevada, USA.

The Company is seeking to process the first gold ore from the Big Springs Project in 2015. The exploration and development activities of the Company are subject to various risks that may impact on the future performance of the Company. The following is a non-exhaustive list of the risks that may have a material effect on the financial position and performance of the Company and the value of its securities, as well as the Company's exploration, development and any mining activities and an ability to fund those activities.

The specific risks below are some of the risks to the Company of a specific nature by reason of its involvement in the resources industry. The general investment risks below are some of the risks to the Company of a general economic nature.

3.2 Specific risks

Operating and Development Risks

In the event of the mining upon the Big Springs Project, the Company's ability to achieve scheduled production, development, operating costs and capital expenditure cannot be assured. The business of gold mining involves many risks and may be impacted by factors including ore tonnes, grade and metallurgical recovery, input prices (some of which are unpredictable and outside the control of the Company), labour force disruptions, cost overruns, changes in regulatory environment and unforeseen contingencies. The Company plans for both open pit and underground mining operations at the Big Springs Project.

Estimates of Ore Reserves and Mineral Resources

Estimating ore reserves and mineral resources is a subjective process where the accuracy of estimates is a function of the quantity and quality of available data, the assumptions used and judgments made in interpreting information. As a result, estimates of ore reserves and mineral resources are inherently imprecise and may have to be recalculated based on matters such as changes in the gold price, production costs or recovery rates and exploration and development activity generally. Any recalculation could adversely affect the Company's operations.

Exploration

The Company intends to conduct further exploration upon the Big Springs Project. Exploration is by its nature a high risk undertaking and there can be no assurance of the success of further exploration such as the discovery of a mineral resource or that existing mineral resources are expanded.

Future capital needs and additional funding

The Company's ability to raise capital (equity or debt) within an acceptable time, of a sufficient amount and on terms acceptable to the Company will vary according to a number of factors, including the success of the exploration and development programs (including any mining), stock market and industry conditions and the price of relevant commodities and exchange rates.

No assurance can be given that future funding will be available to the Company on favourable terms (or at all). If adequate funds are not available on acceptable terms the Company may not be able to further develop its projects and it may impact on the Company's ability to continue as a going concern.

Gold and Commodity Price Volatility

It is anticipated that any revenues derived from mining will primarily be derived from the sale of gold. Consequently, any future earnings are likely to be closely related to the price of gold.

Gold and metal prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include world demand for gold and metals, forward selling by producers and production cost levels in major mineral-producing regions.

Moreover, gold and metal prices are also affected by macroeconomic factors such as expectations regarding inflation, interest rates and global and regional demand for, and supply of, gold or the relevant metal as well as general global economic conditions. These factors may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

Reliance on key personnel

The Company's success largely depends on the core competencies of its Directors and any management and their familiarisation with, and ability to operate in, the resource and development industries.

Contractor Risk

The Company intends to engage mining contractors to undertake a number of the mining operation activities. The successful development of the Big Springs Project is reliant in part on an effective relationship with the contractors.

The Company has entered into a toll treatment agreement with Veris Gold Corp to process ore from the Big Springs Project. Gold bearing ore will be processed at the Jerritt Canyon mill and process facility approximately 42 kilometres from the Big Springs Project. The success of operations of the Company (in the event of commencement of mining) will be reliant in part upon an effective relationship with Veris Gold Corp.

Title

The Big Springs Project consists of a number of mining claims in Nevada, USA. The mining claims are subject to Nevada legislative conditions that must be satisfied to maintain their good standing.

If good title to a mining claim is lost, the Company may suffer significant damage through loss of the opportunity to develop and discover any mineral resources on that mining claim.

Foreign exchange risk

The Company will be exposed to the volatility and fluctuations of the exchange rate between the American dollar and the Australian dollar. Global currencies are affected by a number of factors that are beyond the control of the Company. These factors include economic conditions in the relevant country and elsewhere and the outlook for interest rates, inflation and other economic factors. These factors may have a positive or negative effect on the Company's operations.

Environmental

The Company's operations on its projects are subject to rules and regulations regarding environmental matters and the discharge of hazardous wastes and materials. The Company will need to satisfy environmental guidelines and, where required, seek approvals from government authorities.

The Company intends to conduct its activities in an environmentally responsible manner and in accordance with all applicable laws, but may still be subject to accidents or other unforeseen events which may compromise its environmental performance and which may have adverse financial implications.

3.3 General investment risks

Securities investments and share market conditions

There are risks associated with any securities investment. The trading prices of securities trade fluctuate in response to a number of factors.

Furthermore, the stock market, and in particular the market for exploration and mining companies may experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of such companies. These factors may materially adversely affect the market price of the securities of the Company regardless of the Company's operational performance. Neither the Company nor the Directors warrant the future performance of the Company, or any return of an investment in the Company.

Economic risk

Changes in both Australia and world economic conditions may adversely affect the financial performance of the Company. Factors such as inflation, currency fluctuations, interest rates, industrial disruption and economic growth may impact on future operations and earnings.

Legislative

Changes in relevant taxes, legal and administration regimes, accounting practice and government policies in Australia and the United States of America may adversely affect the financial performance of the Company.

4.10 Rights Attaching to Shares

A summary of the rights attaching to the Share is set out in Section 5.

5. RIGHTS ATTACHING TO SHARES

5.1 Rights attaching to Shares

Full details of the rights and liabilities attaching to the Share are:

- detailed in the Constitution, a copy of which can be inspected, free of charge, at the registered office of the Company during normal business hours; and
- in certain circumstances, regulated by the Corporations Act, the Listing Rules and the general law.

The following is a summary of the more significant rights and liabilities attaching to Shares. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Voting Rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at a general meeting of members every member has one vote on a show of hands and one vote per share on a poll. The person who holds a share which is not fully paid shall be entitled to a fraction of a vote equal to that proportion of a vote that the amount paid (not credited) on the relevant share is of the total amounts paid and payable in respect of those shares (excluding amounts credited). Voting may be in person or by proxy, attorney or representative.

Dividends

Subject to the rights of holders of shares issued with any special rights to dividends (at present there are none) and the Corporations Act, the profits of the Company which the Board may from time to time determine to distribute by way of dividend are to be apportioned and paid proportionately to the amounts paid or credited as paid on the shares during any portion or portions of the period in respect of which the dividend is paid.

Future issues of securities

Subject to the Corporations Act and the Listing Rules, the Directors may issue, grant options over or other securities with rights of conversion to shares or otherwise dispose of, unissued shares in the Company at the times and on the terms that the Directors think proper and a share may be issued with preferential or special rights.

Transfer of Shares

Subject to the Constitution of the Company, the Corporations Act, the Listing Rules and any other applicable law of Australia, shares are freely transferable.

Each shareholder is entitled to receive notice of, and to attend, general meetings for the Company and to receive all notices, accounts and other documents required to be sent to shareholders under the Constitution, the Corporations Act or the Listing Rules.

Shareholders may requisition meetings in accordance with the Corporations Act.

Election of Directors

There must be a minimum of 3 Directors. One third of Directors (or the number nearest one third) must retire at each annual general meeting and any Director must retire from office at the third annual general meeting after the Director was elected or most recently re-elected. These retirement rules do not apply to certain appointments including the managing director. Directors appointed by the Board as additional Directors hold office until the next following annual general meeting and are then eligible for re-election.

If the Listing Rules require an act to be done or not to be done, authority is given for that act to be done or not to be done (as the case may be). If the Listing Rules require the Constitution to contain a provision and it does not contain such a provision, the Constitution is deemed to contain that provision.
