

30 April 2015

QUARTERLY ACTIVITIES REPORT FOR PERIOD ENDED 31 MARCH 2015

HIGHLIGHTS

- Hydrogeological pump testing programme completed
- Key South Sammy mine permit applications submitted
- Resource modelling revision for 601 commenced
- Mining study work on South Sammy continuing
- Commencement of North Sammy permitting

OPERATIONS

Big Springs Gold Project, Nevada, USA

The key activities completed during the March quarter included pump testing of the two hydrogeological holes in January 2015 to measure underground water inflows in the area of the proposed North Sammy underground operations plus analysis of drilling data received for the late 2014 drilling programme.

Mine Study work undertaken during the quarter included:

- geotechnical testwork and data analysis of the new drillcore;
- metallurgical testwork;
- hydrogeology analysis of the pump testing;
- detailed modelling of the 601 resource to include the infill drilling results (in progress).

Key permitting submissions for the Water Pollution Control Permit and the Reclamation Permit were made during the quarter. In addition revisions to the Mining Plan of Operations were completed to incorporate additional requirements from the regulatory authorities.

Pump testing

Four hydrogeology holes were drilled and pump tested in January 2015 for the proposed North Sammy underground zones. Observation data for these pump tests is being collated, modelled and reported for inclusion in future permitting submission for mining of the North Sammy zones.

Geotechnical

Three key geotechnical holes for the proposed 601 and 701 mining areas at South Sammy were drilled in late 2014. Geotechnical logging and downhole (televiewer) data has been analysed and correlated with historic data.

Core samples were submitted for geomechanical testing, including:

- triaxial compression tests
- unconfined compression tests; and
- direct shear tests

The above data has been modelled and is in the final stages of reporting.

Metallurgical testwork

Four diamond core holes were drilled in late 2014 within the proposed 601 open pit mining area at South Sammy primarily to collect new metallurgical sample. Once geological assays were received, representative ore samples were selected from the new core, composited and sent for comminution and roasting/leaching testwork plus mineralogy.

Comminution testwork (Bond Abrasion Index and Bond Ball Mill Work Index) was completed at Dawson Metallurgical Laboratories (FLSmidth) in Salt Lake City, Utah.

Roasting and leaching testwork on the new core is in progress at McClelland Laboratories, Inc in Reno, Nevada.

Resource modelling

Detailed 3-D geology and mineralisation modelling has commenced for the proposed 601 open pit mining area. This will incorporate the new geological and assay drillhole data received for the 39 RC plus 6 diamond core holes drilled into the 601 zone in late 2014.

Once complete, the updated model will be used to refine the open pit optimisation and design for in preparation for mining.

PERMITTING

The company continued to advance its permitting programme through the quarter. Key activities included:

Water Pollution Control Permit (WPCP)

- The WPCP application was submitted in late January to the Nevada Division of Environmental Protection (NDEP).
- Anova was notified in March that the application was formally received and has now entered the technical review phase with the NDEP.

Reclamation Permit

- Reclamation Permit application was finalised during the quarter and was submitted to the Nevada Division of Environmental Protection (NDEP).

South Sammy (601 and 701) Plan of Operations and Environmental Assessment

- The Plan of Operations was updated during the quarter and preparation of the Environmental Assessment (EA) was ongoing.
- Submission of the final EA is targeted for June quarter.

CORPORATE

As at 31 March, the Company's cash balance was \$1.55m.

During the quarter the Company announced a two tranche placement to raise \$2m (before costs) by the issue of 50,000,000 shares at 4 cents per share to sophisticated and professional investors. The first tranche settled immediately with the second tranche to be issued subject to shareholder approval at a General Meeting of the Company to be held on 1 May 2015.

On 6 March, 1,250,000 unlisted 5 cent options were converted into ordinary shares, this raised \$62,500 (before costs) for the Company.

Competent Person Statement

The information in this report that relates to Exploration Results and Mineral Resources is based on information compiled by Mr Lauritz Barnes, Principal Consultant Geologist – Trepanier Pty Ltd. Mr Barnes is a shareholder of Anova Metals. Mr Barnes is a member of the Australian Institute of Geoscientists and has sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration, and to the activities undertaken to qualify as Competent Persons as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Barnes consents to the inclusion in this report of the matters based on his information in the form and context in which they appear.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
