- (c) the printers and the mailing house for the purposes of preparing and distributing Holding Statements and for the handling of mail.

If an Applicant becomes a Security holder of the Company, the Corporations Act requires the Company to include information about the security holder (name, address and details of the Securities held) in its public register. This information must remain in the Company’s register

even if that person ceases to be a Security holder of the Company. Information contained in the Company's register is also used to facilitate distribution payments and corporate communications (including the Company's financial results, annual reports and other information that the Company may wish to communicate to its Security holders) and compliance by the Company with legal and regulatory requirements.

If an Applicant does not provide the information required on the Application Form, the Company may not be able to accept or process their Application.

Under the Privacy Act, a person may request access to their personal information held by (or on behalf of) the Company or the Securities Registry. An Applicant can request access to their personal information by writing to the Company through the Securities Registry.

2. Purpose and effect of the Offers

2.1 Background – proposed merger of Anova and Exterra

On 8 June 2017, Anova and Exterra Resources Limited (**Exterra**) announced that they had entered into the Merger Implementation Agreement in relation to a proposed transaction which, if implemented, will result in Anova acquiring all of the issued shares in Exterra by way of a scheme of arrangement (**Scheme**).

If the Scheme proceeds:

- (a) all Exterra Shares will be transferred to Anova;
- (b) all Exterra Shareholders as at the Record Date (whether or not they voted for or against the Scheme), other than Ineligible Foreign Shareholders or Electing Small Shareholders, will receive one New Anova Share for every two Exterra Shares they hold as at the Record Date (**Scheme Consideration**); and
- (c) Exterra will be de-listed from ASX and will become a wholly-owned subsidiary of Anova.

The Scheme is subject to a number of conditions precedent in addition to the requisite majorities of Exterra Shareholders approving the Scheme Resolution (**Conditions Precedent**), including the following:

- (a) the Court approving the Scheme;
- (b) no temporary restraining order, preliminary or permanent injunction or other order preventing the Scheme being in effect at 8.00am on the Second Court Date;
- (c) no Exterra Material Adverse Change or Anova Material Adverse Change occurring;
- (d) no Exterra Prescribed Event or Anova Prescribed Event occurring;
- (e) before 8.00am on the Second Court Date, binding agreements having been entered into in relation to a sufficient number of Exterra Options to permit Anova to compulsorily acquire any remaining Exterra Options; and
- (f) the aggregate of Anova's cash assets and receivables, less any trade creditors, being above \$5,500,000 as at 8.00am on the Second Court Date.

The Scheme will not proceed unless all the Conditions Precedent are satisfied or waived in accordance with the Merger Implementation Agreement. Further information regarding the Conditions Precedent to the Scheme are set out in Section 9.2 of the Scheme Booklet, announced to ASX on 14 August 2017.

A copy of the Scheme Booklet is available free of charge on Anova's website at www.anovametals.com.au (refer to "ASX Announcements" in the "Investor Centre" tab on the website).

As at the date of this Prospectus, Anova is not aware of any circumstances which would cause the Conditions Precedent not to be satisfied.

2.2 Options Offers

Under the Merger Implementation Agreement, Exterra and Anova agreed to use their reasonable endeavours to procure that each Exterra Optionholder enter into a deed for the cancellation of their Exterra Options in exchange for the grant of Anova Options at a ratio of one Anova Option for every two Exterra Options held.

The cancellation of Exterra Options and issue of Anova Options is subject to the Scheme becoming Effective and is to take effect on the Implementation Date.

Exterra will procure the cancellation of all of the Exterra Options on issue immediately prior to the Implementation Date. Exterra has obtained a waiver from ASX to permit the Exterra Options to be cancelled for consideration without requiring separate Exterra Shareholder approval.

In exchange for the cancellation of the Exterra Options, Anova is required to offer and issue the Anova Options to holders of Exterra Options on the following terms:

Exterra Options				Anova Options			
Tranche	Number	Exercise price	Expiry date	Class	Number	Exercise price	Expiry date

Total	67,832,474				33,916,248		

The offer of the Anova Options under this Prospectus will have the effect that all Anova Options will be issued with disclosure under Chapter 6D of the Corporations Act. Accordingly, neither the Anova Options issued under this Prospectus nor the Shares issued on their exercise will be subject to secondary trading restrictions.

2.3 Use of funds

The Company will not raise any funds under any of the Options Offers. Any funds raised on exercise of Options (up to \$4,493,024.68) will be applied by the Company to its general working capital requirements at that time.

2.4 Capital structure

If all Options that have been agreed to be issued by the Company are issued, and all Offer Securities are subscribed for, the capital structure of the Company is expected to be as follows.

Security type	Number	Percentage of total
Shares		
Shares on issue at the Prospectus Date	453,400,292	72.4%
Shares to be issued under Prospectus	Nil	Nil
Shares to be issued pursuant to the Scheme	172,594,353	27.6%

Security type	Number	Percentage of total
Total Shares following the Implementation Date and completion of the Options Offers	625,994,645	100%
<i>Options – unquoted</i>		
Options on issue at the Prospectus Date	Nil	Nil
Options on issue following Implementation Date	33,916,248	100%
Total Options on issue following the Implementation Date and completion of the Options Offers	33,916,248	100%
<i>Performance rights</i>		
Performance Rights on issue at the Prospectus Date	2,250,000	100%
Performance Rights to be issued under Prospectus	Nil	Nil
Total Performance Rights on issue following the Implementation Date and completion of the Options Offers	2,250,000	100%

Notes: The figures in the table assume:

- (a) additional Securities are not issued after the Prospectus Date; and
- (b) the Offers close fully subscribed.

2.5 Effect on control

The shareholding interests of existing Shareholders may be diluted if the Options issued under the Options Offers are exercised, as this would result in up to 33,916,248 new Shares being issued if full subscription under that offer is reached.

Assuming the Company does not issue any other Shares, this represents a dilutive effect of approximately 5.4%, assuming that the Scheme becomes Effective, the Scheme Consideration is issued, and the Company does not issue any other additional Shares.

Accordingly, the Options Offers (and subsequent issue of Shares on exercise of the Options) should not have a material impact upon the control of the Company.

2.6 Substantial holdings

A “substantial holding” is defined under section 9 of the Corporations Act to mean a relevant interest in 5% or more of the voting shares of a company.

The table below sets out the Shareholders with a substantial holding as at the Prospectus Date. None of these substantial Shareholders will acquire any Anova Options under the Options Offers.

Name	Number of Shares	Percentage interest
Phoenix Gold Fund Limited	27,986,111	6.17%
Lujeta Pty Ltd	25,000,000	5.51%
Alasdair Campbell Cooke	24,889,299	5.49%

2.7 Effect on financial position of the Company

The Company will not raise any funds from the Offers and so they will not have a material effect on the Company's financial position.

However, the Scheme will have a material effect on the Company's financial position. Refer to the following Sections of the Scheme Booklet (announced to ASX on 14 August 2017) for information regarding the financial position of the Company:

- (a) Section 5.4 of the Scheme Booklet, for the Company's consolidated statements of financial position, income and cash flows for the half year ended 31 December 2016 and the years ended 30 June 2016 and 30 June 2015; and
- (b) Section 6.6 of the Scheme Booklet, for a pro forma consolidated statement of financial position of the Merged Group as at 31 May 2017.

A copy of the Scheme Booklet is available free of charge on Anova's website at www.anovametals.com.au (refer to "ASX Announcements" in the "Investor Centre" tab on the website).

3. Risk Factors

3.1 Introduction

Activities in the Company and its controlled entities, as in any business, are subject to risks which may impact on the Company's future performance. There can be no guarantee that the Company will achieve its stated objectives.

Potential investors should read the entire Prospectus and review announcements made by the Company to ASX (at www.asx.com.au under the code AWV) in order to gain an appreciation of the Company, its activities, operations, financial position and prospects.

An investment in the Company's Securities should be considered speculative. Securities carry no guarantee with respect to the payment of any dividends, returns of capital or the market value of those Securities.

As set out in Section 2.1 above, the Company has entered into the Merger Implementation Agreement in relation to a proposed transaction which, if implemented, will result in the Company acquiring all of the issued shares in Exterra by way of a scheme of arrangement.

As set out in Section 1.3 above, the issue of Offer Securities offered under this Prospectus is subject to the Scheme becoming Effective. Consequently, if any Offer Securities are issued, they will be Securities in the Merged Group. As such, the risks applicable to an investment in Offer Securities include risks specific to the Merged Group, in addition to the risks of a general nature that are applicable to any investment in securities.

The risks set out below have been identified as being key risks specific to an investment in the Merged Group. Additional risks relevant to an investment in Securities are set out in Section 7 of the Scheme Booklet (announced to ASX on 14 August 2017).

Investors should consider both the risks set out below and the risks set out in Section 7 of the Scheme Booklet (announced to ASX on 14 August 2017), as all of these risks have the potential to have a significant adverse impact on the Merged Group and may affect the Merged Group's financial position, prospects and price of its listed securities.

A copy of the Scheme Booklet is available free of charge on Anova's website at www.anovametals.com.au (refer to "ASX Announcements" in the "Investor Centre" tab on the website).

3.2 Operating risks for the Merged Group

(a) Development

Further exploration may result in changes to estimates of the size and confidence levels of Mineral Resources or Ore Reserves and the estimated costs of recovering gold from the projects, affecting the economics of the Merged Group's Second Fortune Gold Mine and Big Springs Project.

There is a risk that circumstances (including unforeseen circumstances) may cause a delay to project development, exploration milestones or other operating factors, resulting in the receipt of revenue at a later date than expected or not at all. Additionally, the development of the Second Fortune Gold Mine and the Big Springs Project may exceed the currently envisaged timeframe or cost for a variety of reasons outside of the control of the Merged Group.

Although the rewards can be substantial, there is no guarantee that future exploration on tenements for which the Merged Group has exploration permits or licences will lead to a commercial discovery, or if there is such a discovery, that the Merged Group will be able to develop it economically. Future developments are dependent on whether mining leases can be obtained to recover gold from current or future development and exploration projects. Factors affecting the ability to obtain those mining leases include

native title in Western Australia, impacts on the environment and objects from people and entities with interests located close to the proposed mining leases.

Development of any future Mineral Resources will also be dependent on the exploration and appraisal programs gaining all necessary approvals by government authorities

(b) **Operations**

The operations of the Merged Group may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, access arrangements, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, problems with the road network and ore haulage operations, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, and plant and equipment and contracting risk from third parties providing services essential to the production.

Specifically, in relation to production:

- (i) the Merged Group's operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected rock formations, flooding and extended interruptions due to inclement or hazardous weather conditions and fires, explosions and other accidents;
- (ii) assumptions in the mining models may prove to be wrong including because of changes in economic circumstances or fluctuations in the unitary parameters referred to above.

Accordingly, for these and other reasons, no assurances can be given that the Merged Group will achieve commercial viability through the development and/or mining of its projects. Until the Merged Group can realise value from its projects, it is likely to incur on-going operating losses.

(c) **Production and capital costs**

The Merged Group's business operations and financial condition may vary with fluctuations in production and capital costs. The Merged Group's main production expenses are expected to be contractor costs, materials (including fuel, explosives and mining consumables), personnel costs and energy. The Merged Group will be incurring expenditures in both US and Australian dollars.

Changes in the costs of the Merged Group's mining and processing operations as well as its capital costs could occur as a result of unforeseen events, including international and local economic and political events (including movement in exchange rates), and could result in changes in Ore Reserve estimates. Many of these factors may be beyond the Merged Group's control. In addition, some of the capital cost estimates are based on conceptual engineering design and there may be a material change to the estimates once final engineering has been completed. In past resource cycles, operating and capital costs have tended to increase as commodity prices have increased. Thus, the Merged Group may be faced with higher than currently expected operating and capital costs in the future.

(d) **Financing risks**

Existing funds will not be sufficient for expenditure that might be required for the development of the Second Fortune Gold Mine and the Big Springs Project.

The Merged Group will require additional funds in addition to current cash reserves to fund exploration and mine development activities, which it intends to partially source from operating revenue. The Merged Group will need to raise debt or equity funds in the future. There is no assurance that the Merged Group will be able to obtain additional debt or equity funding when required, or that the terms associated with that funding will be acceptable to the Merged Group and this may have a material adverse effect on the Merged Group.

In general, the Merged Group's funding requirements depend on numerous factors including the Merged Group's ability to generate income from its mine development project, future exploration and work programs, meeting its future obligations and the acquisition of new projects.

The Merged Group's ability to raise further capital, either equity or debt, within an acceptable time, of sufficient quantum and on terms acceptable to the Merged Group will vary according to a number of factors, including:

- (i) prospectivity of projects (existing and/or future);
- (ii) the results of exploration, development and mining;
- (iii) stock market and industry conditions; and
- (iv) the price of relevant commodities and exchange rates.

Additional equity financing, if available, may be dilutive to shareholders and at lower prices than the current market price. Debt financing, if available, may involve restrictions on financing and operating activities. If the Merged Group is unable to obtain additional financing as needed, it may be required to reduce the scope of its proposed operations or anticipated expansion.

(e) **Geology and estimation of Mineral Resources and Ore Reserves**

The quantity of gold (in terms of both ore tonnages and gold grade) that the Merged Group recovers may be less than expected. The Mineral Resource and Ore Reserve estimates of the Merged Group, are stated in accordance with the JORC Code 2012, or where indicated the JORC Code 2004, and are expressions of judgement based on knowledge, experience and industry practice. There are risks associated with such estimates. Mineral Resource and Ore Reserve estimates are necessarily imprecise and depend to some extent on interpretations and geological assumptions, gold prices, cost assumptions, and statistical inferences which may ultimately prove to have been unreliable.

Consequently, Ore Reserve and Mineral Resource estimates are often regularly revised based on actual production experience or new information and could therefore be expected to change. Furthermore, should the Merged Group encounter mineralisation or formations different from those predicted by past drilling, sampling and similar examinations, Ore Reserve and Mineral Resource estimates may have to be adjusted and mining plans may have to be altered in a way that might adversely affect the Merged Group's operations. Moreover, a decline in the price of gold, stabilisation at a price lower than recent levels, increases in production costs, decreases in recovery rates or changes in applicable laws and regulations, including environment, permitting, title or tax regulations, that are adverse to the Merged Group, may mean the quantity of gold that the Merged Group can feasibly extract may be significantly lower than the Ore Reserve and Mineral Resource estimates indicated in this Prospectus. If it is determined that mining of certain of the Merged Group's Ore Reserves has become uneconomic, this may ultimately lead to a reduction in the Merged Group's aggregate Ore Reserves.

If the Merged Group's actual Mineral Resources and Ore Reserves are less than current estimates, the Merged Group's prospects, value, business, results of operations and financial condition may be materially adversely affected.

(f) **Licences, permits and environment**

Mining companies must obtain numerous permits issued by various governmental agencies and regulatory bodies that impose strict regulations on various environmental and safety matters in connection with gold mining. The permitting rules are complex and may change over time, making the Merged Group's ability to comply with the applicable requirements more difficult or even impossible, thereby precluding continuing or future mining operations. Private individuals and the public have certain rights to comment upon and otherwise engage in the permitting process, including through court intervention. Accordingly, the permits the Merged Group needs may not be issued, maintained or renewed, may not be issued or renewed in a timely fashion, or may involve requirements that restrict the Merged Group's ability to conduct its mining operations. Another factor affecting future developments is successfully obtaining the grant of mining leases to recover gold from current or future exploration projects. No assurance can be given that current or future development and exploration will lead to mining operations.

Environmental regulation of mining activities imposes significant obligations on mining companies in relation to pollution control during mining operations and rehabilitation on completion of them. Further, whilst the Merged Group has provided or will provide environmental bonds to the relevant regulatory bodies in respect of the anticipated cost of rehabilitation, actual rehabilitation costs may exceed the amount of the bonds provided and the Merged Group may be required to expend more money than anticipated to complete rehabilitation of its projects.

Changes to environmental regulation or circumstances beyond the control of the Merged Group, such as drought or flood, may impact on the cost of meeting the Merged Group's environmental obligations. Environmental and safety legislation may change in a manner that may require standards in addition to those now in effect, and a heightened degree of responsibility for companies and their directors and employees. There may also be unforeseen environmental liabilities resulting from gold production related activities, which may be costly to remedy. In particular, the acceptable level of pollution and the potential abandonment costs and obligations for which the Merged Group may become liable as a result of its activities may be impossible to assess against the current legal framework.

(g) **Shortage of skilled labour and industrial action**

A shortage of skilled labour in the mining industry in Australia or the USA could result in the Merged Group having insufficient employees or contractors to operate its business, which could adversely affect the Merged Group's business, results of operations and financial condition. Similarly, industrial action by the Merged Group's (future) employees or mining contractors' employees could disrupt operations (e.g. employees covered by industrial agreements may take protected industrial action (e.g. strike) once these agreements pass their normal expiry date).

The Merged Group will depend on a large number of contracted personnel, including those supplied by the Mitchell River Group. There is a risk that contracted personnel fail to perform their contractual obligations and that the Merged Group is unable to find suitable replacement contractors. While the situation is normal for the mining and exploration industry, problems caused by third parties may arise which have the potential to impact on the performance of the Merged Group.

(h) **Dependence on key personnel supplied by the Mitchell River Group**

The loss of key personnel and the failure to recruit sufficiently qualified staff could affect the Merged Group's future performance. Both Exterra and Anova have entered into contracts with the Mitchell River Group for the supply of key personnel whose expertise and experience in the mining industry are important to the continued development and operation of its mining interests.

Due to the personnel of the Mitchell River Group having intimate knowledge of the Merged Group's mineral assets, their industry specific experience and the important role they have taken in developing the Merged Group's mining, business and financial plans,

the Merged Group could be adversely affected if any of them ceased to actively participate in the management of the Merged Group, left the Merged Group entirely or ceased employment with the Mitchell River Group. There may be a limited number of persons with the requisite experience and skills to serve in the Merged Group's senior management positions if existing management leave the Merged Group or the Mitchell River Group.

If the Merged Group cannot attract, train and retain qualified managers, the Merged Group may be unable to successfully manage its growth or otherwise compete effectively in the Australian gold industry.

(i) **Reliance on third parties**

In addition to the 'Dependence on key personnel risk' in Section 3.2(h) above, through the Merged Group's use of contractors and other third parties for exploration, mining and other activities, it is reliant on others for the success of its current operations, development projects and exploration assets. While the situation is normal for the mining and exploration industry, problems caused by third parties may arise which have the potential to impact on the performance of the Merged Group.

(j) **Potential for director conflict**

Insofar as certain directors of the Merged Group hold similar positions with other mineral resource companies, conflicts may arise between the obligations of these directors to the Merged Group and to such other mineral resource companies.

The proposed directors and officers of the Merged Group are, and may continue to be, involved in the mining and mineral exploration industry through their direct and indirect participation in corporations, partnerships or joint ventures which are potential competitors of the Merged Group. Situations may arise in connection with potential acquisitions and investments where the other interests of these directors and officers may conflict with the interests of the Merged Group. Directors and officers of the Merged Group with conflicts of interest will be subject to and will follow the procedures set out in applicable corporate and securities legislation, regulations, rules and policies.

(k) **Hazardous materials**

The Merged Group's operations may substantially impact the environment or cause exposure to hazardous materials. The Merged Group will use hazardous materials and will generate hazardous waste.

The Merged Group may be subject to common law claims, natural resource damages and other damages as well as the investigation and clean-up of soil, surface water, groundwater, and other media. Such claims may arise, for example, out of current or former activities at sites that the Merged Group owns or will operate. Mining operations can also impact flows and water quality in surface water bodies and remedial measures may be required, such as lining of stream beds, to prevent or minimise such impacts.

These and other impacts that the Merged Group's operations may have on the environment, as well as exposures to hazardous substances or wastes associated with the Merged Group's operations and environmental conditions at the Merged Group's properties, could result in costs and liabilities that would have a material adverse impact on the financial position and operating results of the Merged Group.

(l) **Title**

The Merged Group's properties and mineral claims may be subject to prior unregistered agreements or transfers and title may be affected by undetected defects. Accordingly, other parties could possibly dispute the Merged Group's title to its mining rights and other interests, which if successful may have a material adverse impact on the financial position and operating results of the Merged Group.

Mining tenements in Western Australia are subject to periodic renewal. The renewal of the term of a granted tenement is also subject to the discretion of the relevant Minister. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the tenements comprising the Merged Group's projects located in Western Australia. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.

Each licence or lease in Western Australia carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Merged Group could lose title to or its interest in its Western Australia tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments.

The Big Springs Project consists of a number of mining claims in Nevada, USA. The mining claims are subject to Nevada legislative conditions that must be satisfied to maintain their good standing. If good title to a mining claim is lost, the Merged Group may suffer significant damage through loss of the opportunity to develop and discover any mineral resources on that mining claim.

(m) **Potential costs of reclamation are uncertain**

The Merged Group's operations are subject to reclamation plans that oblige the Merged Group to reclaim properties after a site has been mined. These obligations may represent significant future costs for the Merged Group and will be evaluated by the Merged Group Board on a regular basis.

The costs of reclamation set out in mine plans are estimates only and may not specify the actual costs required to complete reclamation activity. If these costs are significantly higher than estimates, it could have a material adverse effect on the Merged Group's results.

(n) **Third party land access**

The Merged Group's properties and mineral claims are affected by competing overlapping land interests and the Merged Group will need to enter into land access arrangements with such overlapping landholders in order to conduct its operations. Any refusal to grant such access, or delay in obtaining such access, may adversely affect the planned operations of the Merged Group.

(o) **Toll milling risks**

The Second Fortune Gold Mine and the Big Springs Project contemplate processing of mined ore through third party toll milling arrangements. Exterra has received a proposal for toll treatment but has not yet entered into an agreement to process ore from the Second Fortune Gold Mine. While Anova has identified parties who may be able to toll mill mined ore from the Big Springs Project it does not presently have an agreement to do so. The success of operations of the Merged Group (in the event of commencement of mining at the Second Fortune Gold Mine and the Big Springs Project) will be reliant in part on entering into toll treatment agreement on terms favourable to the Merged Group and upon maintaining effective relationships with the parties providing the toll treatment services.

(p) **Taxation risks**

The Merged Group may be exposed to greater than expected tax liabilities. The Merged Group will be subject to taxes in Australia and the USA and may be subject to review by USA and foreign tax authorities. There can be no assurance that taxation authorities will not seek to challenge the Merged Group's tax structure in the future.

3.3 Market and investment risks

(a) Gold prices and demand

The Merged Group's profits are expected to be derived from the production and sale of gold. In developing its mine plans, the Merged Group has made certain assumptions regarding gold prices and demand for gold. The price which the Merged Group will receive for its gold depends on numerous factors and accordingly, some or all of the Merged Group's underlying assumptions may materially change and actual gold prices and demand may differ materially to those expected by the Merged Group. Many of these factors are out of the control of the Merged Group and may have a material adverse impact on gold prices and demand. There may be limited scope for the Merged Group to limit gold price risk in its gold sales contracts.

A substantial and prolonged fall in the gold price realised by the Merged Group could result in a material deterioration in the financial performance and position of the Merged Group and may have a significant adverse effect on the price of shares in the Merged Group.

(b) Exchange rate fluctuations

Fluctuations in foreign currency exchange rates could significantly affect the Merged Group's business, financial condition, results of operations and liquidity.

The price of gold is set in international markets and is generally denominated in US dollars. The Merged Group's operating costs will be denominated in a mix of currencies, predominantly US and Australian dollars.

If the Australian dollar strengthens in value relative of the US dollar, then, all other factors being equal, the Merged Group's financial results will be adversely affected due to the resultant lower Australian dollar receipts.

The Merged Group Board will consider whether to manage exchange rate and gold price fluctuation risk through hedging arrangements. Additionally, the Merged Group may be required under the terms of any financing to enter into hedging arrangements in respect of gold price and exchange rate fluctuations.

However, there can be no assurance that the Merged Group will hedge its gold price and exchange rate exposure, that it will be able to hedge such exposure on acceptable terms in the future or that any gold price or exchange rate hedging conducted by the Merged Group will be effective or will not result in an adverse financial impact arising from an inability to benefit from a favourable movement in gold prices or exchange rates.

(c) Stock market fluctuations and economic conditions

The Options issued under this Prospectus carry no guarantee in respect of profitability, dividends, return of capital, or the price at which they may trade on ASX. The value of the Options will be determined by the stock market and will be subject to a range of factors beyond the control of the Merged Group and the Merged Group Directors.

Such factors include, but are not limited to, the demand for and availability of Anova Shares, movements in domestic interest rates, exchange rates, fluctuations in the Australian and international stock markets and general domestic and economic activity. Returns from an investment in the Options may also depend on general stock market conditions as well as the performance of the Merged Group.

Changes in economic and business conditions or government policies in Australia, the USA or internationally may affect the fundamentals which underpin the projected growth of the Merged Group's target markets or its cost structure and profitability. Adverse changes in such things as the level of inflation, interest rates, exchange rates, government policy (including fiscal, monetary and regulatory policies), consumer spending and employment rates, among others, are out of the control of the Merged

Group, the directors, and the Merged Group's management and may result in material adverse impacts on the business or its operating results.

(d) **Repatriation of earnings**

Changes in legislation regarding repatriation of earnings may adversely affect the Merged Group's operations. The merged Group will conduct a part of its operations through a foreign subsidiary and holds its non-Australian assets in that subsidiary. Accordingly, any limitation on the transfer of cash or other assets between the Merged Group and its subsidiaries could restrict the Merged Group's ability to fund its operations efficiently. Any such limitations, or the perception that such limitation may exist now or in the future, could have an adverse impact on the Merged Group's valuation and stock price. Moreover, there is no assurance that USA or any other foreign country in which the Company may operate in the future will not impose restrictions on the repatriation of earnings to foreign entities.

(e) **Wars, terrorism, political and environmental events**

Events may occur within or outside Australia and/or the USA that could impact upon the world economy, the market for gold, the operations of the Merged Group, and the price of Anova Shares. These events include war, acts of terrorism, civil disturbance, political intervention and natural events such as earthquakes, floods, fires and poor weather affecting roadways, mining and transport. The Merged Group has only a limited ability to insure against some of these risks.

3.4 Legal risks

(a) **Potential losses and insurance**

The Merged Group's insurance will not cover all potential losses, liabilities and damage related to its business and certain risks are uninsured or uninsurable.

The Merged Group's business will be subject to a number of risks and hazards generally, including adverse environmental conditions and pollution, industrial accidents, labour disputes, unusual or unexpected geological conditions, ground or slope failures, cave-ins, changes in the political or regulatory environment and natural phenomena such as inclement weather conditions, floods, earthquakes and dust storms. Such occurrences could result in damage to mineral properties or production facilities, personal injury or death, environmental damage to the Merged Group's properties or others, delays in mining, monetary losses and possible legal liability.

Although the Merged Group will maintain insurance to protect against certain risks in such amounts as the Merged Group considers to be reasonable, the insurance may not cover all the potential risks associated with the Merged Group's operations and insurance coverage may not continue to be available or may not be adequate to cover any resulting liability. It is not always possible to obtain insurance against all such risks and the Merged Group may decide not to insure against certain risks because of high premiums or other reasons. Moreover, insurance against risks such as environmental pollution or other hazards as a result of exploration and production is not generally available to us or to other companies in the mining industry on acceptable terms. Losses from these events may cause the Merged Group to incur significant costs that could have a material adverse effect upon the Merged Group's financial performance and results of operations or otherwise affect the Merged Group's insurability and reputation in the market.

If the Merged Group incurs losses not covered or not fully covered by its insurance policies, such losses may adversely affect the Merged Group's business, operating results and financial condition.

(b) **Native title**

It is possible that, in relation to tenements in which the Merged Group has an interest or may acquire such an interest, there may be areas over which legitimate common law

native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Merged Group to obtain the consent of any relevant land owner, or to progress from the exploration phase to the development and mining phases of the operation, may be adversely affected. It is possible that there will exist on the Merged Group's Australian mining assets, areas containing sacred sites or sites of significance to Aboriginal people subject to the provisions of Australian cultural heritage legislation. As a result land within the tenements may be subject to exploration, mining or other restrictions as a result of claims of Aboriginal heritage sites or native title.

(c) **Litigation**

Like any business, the Merged Group is exposed to risks that litigation could have a material adverse effect on the Merged Group. As at the date of this Prospectus, the Merged Group is not aware of any current litigation matters that are considered material to the Merged Group's business.

3.5 Merged Group specific risks

The following risks have been identified as being key risks specific to an investment in the Merged Group. These risks have the potential to have a significant adverse impact on the Merged Group and may affect the Merged Group's financial position, prospects and price of its listed securities.

(a) **Integration risk**

The long term success of the Merged Group will depend, amongst other things, on the success of management in integrating the respective businesses and the strength of management of the Merged Group. There is no guarantee that the businesses of the Merged Group will be able to be integrated successfully within a reasonable period of time. There are risks that any integration of the businesses of Exterra and Anova may take longer than expected and that anticipated efficiencies and benefits of that integration may be less than estimated. These risks include possible differences in the management culture of the two groups, inability to achieve synergy benefits and cost savings, and the potential loss of key personnel.

Any failure by the Merged Group to ensure implementation costs remain below those anticipated may have a material adverse effect on the financial performance and position, and prospects, of the Merged Group

(b) **Joint venture risks**

If Exterra acquires a 75% interest in the Bar Twenty Project, that project will be conducted under a joint venture with Bar Twenty Pty Ltd. Such joint venture arrangements may result in the approval of all parties to the joint venture being required for certain operational and governance decisions. This may mean that a party may have veto rights, or similar rights, which could negatively affect the Merged Group's operations or financial position in the future.

(c) **Other risks**

Additional risks and uncertainties not currently known to the Merged Group may also have a material adverse effect on the Merged Group and the information set out above does not purport to be, nor should it be construed as representing, an exhaustive list of the risks affecting the Merged Group.

4. Rights and liabilities attached to Offer Securities

4.2 Rights and liabilities attaching to Shares

If Option holders exercise their Options, the Shares issued will be fully paid ordinary shares in the capital of the Company and will rank equally with the existing Shares on issue.

Full details of the rights and liabilities attaching to the Shares are contained in the Constitution and, in certain circumstances, are regulated by the Corporations Act, the Listing Rules, the ASX Settlement Rules and the common law. The Constitution is available for inspection free of charge at the Company's registered office and on the Company's website (www.anovametals.com.au).

The following is a broad summary (though not necessarily an exhaustive or definitive statement) of the rights and liabilities attaching to the Shares:

(a) **Share capital**

All issued ordinary fully paid shares in the capital of the Company rank equally in all respects.

(b) **Voting rights**

Subject to any rights or restrictions for the time being attached to any class or classes of Shares, at a general meeting of members every member has one vote on a show of hands and one vote per share on a poll. The person who holds a share which is not fully paid shall be entitled to a fraction of a vote equal to that proportion of a vote that the amount paid (not credited) on the relevant share is of the total amounts paid and payable in respect of those shares (excluding amounts credited). Voting may be in person or by proxy, attorney or representative.

(c) **Dividends**

Subject to the rights of holders of shares issued with any special rights to dividends (at present there are none) and the Corporations Act, the profits of the Company which the Board may from time to time determine to distribute by way of dividend are to be

apportioned and paid proportionately to the amounts paid or credited as paid on the shares during any portion or portions of the period in respect of which the dividend is paid.

(d) **Rights on winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution of the Company, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders. The liquidator may, with the authority of a special resolution of the Company, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability. Where an order is made for the winding up of the Company or it is resolved by special resolution to wind up the Company, then on a distribution of assets to members, Shares classified by ASX as restricted securities at the time of the commencement of the winding up shall rank in priority after all other Shares.

(e) **Future issues of securities**

Subject to the Corporations Act and the Listing Rules, the Directors may issue unissued shares in the Company, grant to any person options or other securities with rights of conversion to shares or pre-emptive rights to any shares, at the times and on the terms that the Directors think proper, and a share may be issued with preferential or special rights.

(f) **Transfer of Shares**

Subject to the Constitution, the Corporations Act, the Listing Rules and any other applicable law of Australia, shares are freely transferable.

(g) **Meetings and Notices**

Each shareholder is entitled to receive notice of, and to attend, general meetings for the Company and to receive all notices, accounts and other documents required to be sent to shareholders under the Constitution, the Corporations Act or the Listing Rules. Shareholders may requisition meetings in accordance with the Corporations Act.

(h) **Variation of rights attaching to Shares**

Pursuant to sections 246B to 246E of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders, vary or abrogate the rights attaching to Shares.

If at any time the Share capital is divided into different classes of Shares, the rights attached to any class (unless otherwise provided by the terms of issue of the Shares of that class), whether or not the Company is being wound up may be varied or abrogated with the consent in writing of the holders of three-quarters of the issued Shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the Shares of that class.

5. Continuous disclosure documents

5.1 Continuous disclosure obligations

This is a Prospectus for the offer of options to subscribe for continuously quoted securities (as defined in the Corporations Act), and is issued pursuant to section 713 of the Corporations Act as a transaction specific prospectus. Accordingly, this Prospectus does not contain the same level of disclosure as an initial public offering Prospectus.

The Company is a “disclosing entity” for the purposes of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations.
